1971
Computer Design Index

An up-to-date listing of feature articles published this year

COMPONENTS FOR DIGITAL ELECTRONICS

Magnetic Components

M. Dries, **Determining Core Windows by the Use of Graphical Analysis** ..... July, p 59

E. P. Valstyn, R. I. Potter, and A. Paton, **Validity of Scale Models in Magnetics** ..... Oct, p 94

D. Wilken, **Measurement Instrument Aids Design and Manufacture of High Frequency Read/Write Heads** ..... Mar, p 84

Motors

T. E. Beling, **Drive System for Small or Large Angle PM Stepping Motors** ..... Mar, p 77

Optical Components

Vertical Format Tape Reading Assembly Uses Fiber Optics ..... Apr, p 74

Power Sources and Regulators

R. J. Widlar, **Local IC Regulator for Logic Circuits** ..... May, p 115

COMPUTERS

General

C. G. Bell and J. Grason, **The Register Transfer Module Design Concept** ..... May, p 87

A. K. Bhushan, **Guidelines for Minicomputer Selection** ..... Apr, p 43

G. L. Hollander, **System Architecture: Art or Science** ..... Jan, p 67

D. L. House and R. A. Henzel, **The Effect of Low Cost Logic on Minicomputer Organizations** ..... Jan, p 97

K. J. Thurber and R. O. Berg, **Applications of Associative Processors** ..... Nov, p 103

D. C. Wyland, **Associative Read-Only Memory Technique: A Key to LSI Control Logic** ..... Sept, p 61

General-Purpose Digital Computers (See also Computers)

A. K. Bhushan, **Guidelines for Minicomputer Selection** ..... Apr, p 43

Faster, Lower Cost Minicomputer Uses Same Software as Earlier Models ..... Sept, p 86

A. D. Goldstein, **Advanced Packaging and MOS/LSI Used in Miniature Computer Designs** ..... Dec, p 35

Minicomputer Can Be Engineered by System User ..... Dec, p 66

Minicomputer Designed for Larger Systems Offers High Performance per Dollar ..... Mar, p 90

Hybrid Computers and Systems

J. S. Loui, **A One-Map Approach to Hybrid Computer Design** ..... Dec, p 58

Multiprocessors

T. C. Chen, **Parallelism, Pipelining, and Computer Efficiency** ..... Jan, p 69

D. R. Wulfinghoff, **Code Activated Switching: A Solution to Multiprocessing Problems** ..... Apr, p 67

Real-Time Computers

R. O. Berg and K. J. Thurber, **A Multiplexed I/O System for Real-Time Computers** ..... May, p 99

Signal Processors

W. W. Moyer, **A High-Speed Indexing Unit for FFT Algorithm Implementation** ..... Dec, p 45

DATA COMMUNICATIONS

Communications Processors

J. C. Tirrell, **Analysis of the Throughput of a Communications Processor—Part I** ..... Sept, p 47
Part II ..... Oct, p 89

Data Transmission Equipment

D. J. DaCosta, **Technique for Predicting Skin Effect in Digital Transmission** ..... Nov, p 116

General

J. E. Buckley, **Adaptive Error Control** ..... Dec (1970), p 14

Binary Synchronous Communications Procedures ..... Jan, p 12

Communications Engineering ..... June, p 12

Communication Tariffs ..... Feb, p 12

Data Line Concentrator System ..... Nov, p 12

Digital Multiplexer Fundamentals ..... May, p 14

Error Control Techniques—Part I ..... July (1970), p 14

Error Control Techniques—Part II ..... Aug (1970), p 12

Facsimile ..... Oct, p 14

Interconnection—Part I ..... Oct (1970), p 10

Interconnection—Part II ..... Nov (1970), p 14

Modem Fundamentals ..... May (1970), p 40

New Communications Common Carriers ..... Aug, p 12

PCM Carrier Systems ..... Apr, p 12

Satellite Communication ..... July, p 14

Satellite Communications and Telephone Network Error Analysis ..... Dec, p 10

Telephone Carrier Systems ..... Mar, p 10

Telephone Network Error Analysis—Part I ..... Sept (1970), p 14

Telephone Network Error Analysis—Part II ..... Sept, p 10

Transmission Facilities—Part I ..... Feb (1970), p 44

Transmission Facilities—Part II ..... Apr (1970), p 16

Transmission Methods ..... June (1970), p 20

J. B. Fairbaugh, **Communication Pollution** ..Mar (1970), p 44
L. M. Leibowitz, **Synchronous Pulse Width Detection** .....Nov, p 112

Modems, Data Sets

K. I. Nordling and T. V. Saliga, **A High Speed Modem with Built-In Error Control** .....Nov, p 91

DIGITAL CIRCUITS

Arithmetic Circuits (See also Arithmetic)

M. E Hoff, Jr and S. Mazor, **Operation and Application of MOS Shift Registers** .....Feb, p 57
Pental Circuit for Conversionless Decimal Counter .....Jan, p 106
P. S. Tien, **Sequential Counter Design Techniques** .....Feb, p 49
A. Turecki, **An Efficient High-Speed Counter** .....Sept, p 72

Integrated Circuits (See also Arithmetic Circuits, Logic Circuits, Other Digital Circuits, Computers, Magnetic Disc and Drum Storage and A-D & D-A Conversion Equipment)

ECL Circuits Offer Optimum Speed/Power Product .....May, p 136
D. Femling, **Enhancement of Modular Design Capability by Use of Tri-State Logic** .....June, p 59
A. D. Goldstein, **Advanced Packaging and MOS/LSI Used in Miniature Computer Designs** .....Dec, p 35
L. Herzenberg and K. W. Andres, **An LSI Approach to Keyboard Encoding** .....Oct, p 81
J. R. Logan, **A Square-Summing, High-Speed Multiplier** .....June, p 67
A. Nguyen-Huu, **An Analysis of the Ringing Phenomenon in Digital Systems** .....July, p 39
W. G. Tees, **Predicting Failure Rates of Yield Enhanced LSI** .....Feb, p 65
P. R. Thrift, **Using Open Emitter Coupled Logic Gates** .....May, p 132
R. J. Widlar, **Local IC Regulator for Logic Circuits** .....May, p 115
D. C. Wyland, **Associative Read-Only Memory Technique: A Key to LSI Control Logic** .....Sept, p 61

Logic Circuits (See also Digital Logic and Switching Theory

P. M. Kintner, **Mixed Logic: A Tool for Design Simplification** .....Aug, p 55
D. L. Moon, **Bipolar Logic Test Pattern Generation** Mar, p 63
R. J. Widlar, **Local IC Regulator for Logic Circuits** .....May, p 115

Other Digital Circuits

Constant-Voltage Drive Current-Steering Switch ..Jan, p 106
M. A. Liccardo, **Polynomial Error Detecting Codes and Their Implementation** .....Sept, p 53
F. J. Link, **The Use of a Complementary MOS Sequence Timer** .....Feb, p 74

DIGITAL MATHEMATICS AND LOGIC DESIGN

Arithmetic (See also Arithmetic Circuits)

J. R. Logan, **A Square-Summing, High-Speed Multiplier** .....June, p 67
M. D. Perle, **Cordic Technique Reduces Trigonometric Function Look-Up** .....June, p 72

Digital Logic and Switching Theory (See also Logic Circuits)

D. L. Dietmeyer, **Automated NAND Network Synthesis** .....Mar, p 53
D. Femling, **Enhancement of Modular Design Capability by Use of Tri-State Logic** .....June, p 59
R. B. Lackey and R. W. Wolf, **Design of Asynchronous Sequential Machines with Regular Expressions** May, p 123
J. S. Loui, **A One-Map Approach to Hybrid Computer Design** .....Dec, p 58
S. L. Senders and J. R. Lucchesi, **Design of Sequential Switching Circuits with the Cube Logic Technique** .....Apr, p 59
P. S. Tien, **Sequential Counter Design Techniques** Feb, p 49

Information Theory

L. Accardi, **12-Bit D-A Conversion Accuracy** .....Sept, p 82
C. F. Cole, Jr, **Cyclic Codes in Analog-to-Digital Encoders** .....May, p 107
R. Kastelic, **Error Detection Techniques in Computers** .....Nov, p 120
M. A. Liccardo, **Polynomial Error Detecting Codes and Their Implementation** .....Sept, p 53
D. R. Wulfinghoff, **Code Activated Switching: A Solution to Multiprocessing Problems** .....Apr, p 67

HARDWARE FOR DIGITAL ELECTRONICS

General

A. D. Goldstein, **Advanced Packaging and MOS/LSI Used in Miniature Computer Designs** ..Dec, p 35

Indicators; Readouts; Digital Displays; Lamps

R. W. Ahrons, **Gallium Phosphide Diodes Offer Brighter Lamps and Displays** .....Jan, p 102
Solid-State Numeric Indicator Features DTL-TTL Compatibility .....Feb, p 76

Parts

P. M. Dusini, **Selecting Proper Bearings for Computer Peripheral Equipment** .....June, p 80

INPUT/OUTPUT AND RELATED EQUIPMENT

Display Equipment (See also Indicators; Readouts; Digital Displays; Lamps)

J. E. Bryden, **Visual Displays for Computers** .....Oct, p 55

General

R. O. Berg and K. J. Thurber, **A Multiplexed I/O System for Real-Time Computers** .....May, p 99
P. M. Dusini, **Selecting Proper Bearings for Computer Peripheral Equipment** .....June, p 80
M. A. Liccardo, **Polynomial Error Detecting Codes and Their Implementation** .....Sept, p 53

Interface Equipment

D. Lignos, **An Approach to a Fixed Head Disc Interface Logic Design** .....July, p 48

Keyboard Equipment; Data Entry Equipment

L. Herzenberg and K. W. Andres, **An LSI Approach to Keyboard Encoding** .....Oct, p 81
D. Mrazek, **A Scanning Technique for Keyboard Encoding** .....Dec, p 53

Printing Equipment

R. Zaphiropoulos, **Advantages of Electrostatic Printing and Plotting** .....Nov, p 97

Punch Tape Equipment

High Speed Reader/Spooler Combination Aids Total Programmed Control Design .....June, p 86
Vertical Format Tape Reading Assembly Uses Fiber Optics .....Apr, p 74

INSTRUMENTATION AND CONTROL EQUIPMENT

Analog-Digital and Digital-Analog Conversion Equipment

L. Accardi, **12-Bit D-A Conversion Accuracy** .....Sept, p 82

C. F. Cole, Jr, **Cyclic Codes in Analog-to-Digital Encoders** .....May, p 107

Data and Signal Generators

D. L. Moon, **Bipolar Logic Test Pattern Generation** Mar, p 63

Digital Equipment Testers

J. J. Thomas, **Automated Diagnostic Test Programs for Digital Networks** .....Aug, p 63

D. Wilken, **Measurement Instrument Aids Design and Manufacture of High Frequency Read/Write Heads** .....Mar, p 84

MEMORY/STORAGE EQUIPMENT

General

C. G. Bell and D. Casasent, **Implementation of a Buffer Memory in Minicomputers** .....Nov, p 83

W. W. Farr and W. E. Peisel, **An Optimum Disc Organization for a Virtual Memory System** .....June, p 49

R. M. Meade, **Design Approaches for Cache Memory Control** .....Jan, p 87

A. Weinberger, **The Hybrid Associative Memory Concept** .....Jan, p 77

Magnetic Core Storage

Constant-Voltage Drive Current-Steering Switch ..Jan, p 106

M. Dries, **Determining Core Windows by the Use of Graphical Analysis** .....July, p 59

Magnetic Disc Drum Storage

W. W. Farr and W. E. Peisel, **An Optimum Disc Organization for a Virtual Memory System** .....June, p 49

High Density Recording Provides High Performance Head-per-Track Disc Memories .....Oct, p 100

D. Lignos, **An Approach to a Fixed Head Disc Interface Logic Design** .....July, p 48

D. Wilken, **Measurement Instrument Aids Design and Manufacture of High Frequency Read/Write Heads** .....Mar, p 84

Magnetic Tape Storage

Buffered Magnetic Tape Transport Provides Design Flexibility .....Nov, p 122

Optical Storage

H. R. Dell, **Design of a High Density Optical Mass Memory System** .....Aug, p 49

Read-Only Storage (See also Semiconductor Storage)

Optical ROM System Allows Simple Field Alterations .....July p 70

D. C. Wyland, **Associative Read-Only Memory Technique: A Key to LSI Control Logic** .....Sept, p 61

Semiconductor Storage

B. Frazee, **MOS Storage Circuits Simplify Memory Design** .....May, p 128

M. E. Hoff, Jr and S. Mazor, **Operation and Application of MOS Shift Register** .....Feb, p 57

MOS-RAM Approach Provides Small or Large Memory System Flexibility .....Aug, p 70

Read-Write Semiconductor Memory Card Has Nonvolatility Feature .....Jan, p 108

TA'S Instrument Case Engineering Manual

Makes you a packaging expert!

This one-of-a-kind booklet contains everything you need know to select the proper case for **your particular** packaging requirements. ■ Save money for your firm by selecting one of TA's standard cases rather than going to the expense of designing a custom case to package your product. ■ Huge warehouse stock for fast delivery at low prices . . . no tooling charges. All TA cases are designed to surpass Mil-Spec requirements . . . completely dust and waterproof. Free vellum service and panel templates. ■ Write or phone for a quotation and let us put our staff of case engineers to work for you today. Send for your free case manual now.

TA MFG CORP A VIKING INDUSTRIES COMPANY

4607 Alger Street, Los Angeles, California 90039 ■ Phone 213-240-4600/ TWX 910-497-2065 L. A./WUX CAT L. A., Calif.

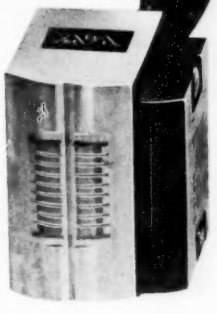
CIRCLE 36 ON INQUIRY CARD

YOU GET THE BEST IN MAGNETIC HEAD QUALITY AND PERFORMANCE WHEN YOU

leader in magnetic head technologies

TAPE • DISC • CASSETTE

- No-external-shields option
- 5 to 200 ips
- Highest quality for any quantity
- Many standard designs available at lowest prices
- New: Cassette read-after-write heads; multi-track flying heads



MDI MAGNUSONIC DEVICES, INC.

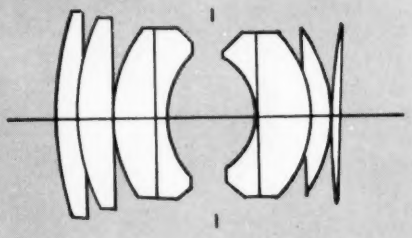
Nikon
CRT Nikkor Lens

Specially formulated to record from P-11 phosphors in cathode ray tubes, this lens exhibits 95% efficiency in this application (specifications below). For same-size (1:1) work, the Repro-Nikkor lens can also be used for CRT applications. For details on these and other Nikkor special lenses call or write Nikon Inc./PTP Inc., Garden City, N.Y. 11530. (516) 248-5200. Telex 125855. Subsidiary of Ehrenreich Photo-Optical Industries, Inc.

Focal length 55mm
Aperture range f1.2-f11
Optimum conjugate 1:5.5-1:4.4
Image area 43.3mmϕ
Overall working dist. .. 388.46mm (1:5.5)
Optimum phosphor P-11



Off-the-shelf special optics by Nikon
